**Subject:** Skee Ball LIVE (NSBL) alleys

LT, Dawg.

Can you and I chat on the financial model and BOM/margin of the Skee Ball product? I simply want to know what we need to shoot, or what was negotiated, for with the next 25 alleys to be built (and possibly redesigned) with a closer eye on BOM. The components being added to the product for their customization and utilization are adding a significant chunk to the BOM. (I think I emailed some of those details to you earlier). At what point need we be concerned?

Thanks,  
Eric
